Report on review of quarterly information

To the Board of Directors and Shareholders
Indústrias Romi S.A.

Introduction

We have reviewed the accompanying parent company and consolidated interim accounting information of Indústrias Romi S.A. ("Company"), included in the Quarterly Information Form (ITR) for the quarter ended March 31, 2015, comprising the balance sheet at that date and the statements of income, comprehensive income, changes in equity and cash flows for the quarter then ended, and a summary of significant accounting policies and other explanatory information.

Management is responsible for the preparation of the parent company and consolidated interim accounting information in accordance with the accounting standard CPC 21, Interim Financial Reporting, of the Brazilian Accounting Pronouncements Committee (CPC) and International Accounting Standard (IAS) 34, Interim Financial Reporting issued by the International Accounting Standards Board (IASB), as well as the presentation of this information in accordance with the standards issued by the Brazilian Securities Commission (CVM), applicable to the preparation of the Quarterly Information (ITR). Our responsibility is to express a conclusion on this interim accounting information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and International Standards on Reviews of Interim Financial Information (NBC TR 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Brazilian and International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the interim information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying parent company and consolidated interim accounting information included in the quarterly information referred to above has not been prepared, in all material respects, in accordance with CPC 21 and IAS 34 applicable to the preparation of the Quarterly Information, and presented in accordance with the standards issued by the CVM.

These statements are the responsibility of the Company's management, are required to be presented in accordance with standards issued by the CVM applicable to the preparation of Quarterly Information (ITR) and are considered supplementary information under IFRS, which do not require the presentation of the statement of value added. These statements have been submitted to the same review procedures described above and, based on our review, nothing has come to our attention that causes us to believe that they have not been prepared, in all material respects, in a manner consistent with the parent company and consolidated interim accounting information taken as a whole.

The item "Receivables - onward lending of FINAME manufacturing financing" refers to sales to customers financed by funds from the National Bank for Economic and Social Development ("BNDES") (Note 13).

Indústrias Romi S.A.

Notes to the quarterly information (ITR) at March 31, 2015

All amounts in thousands of reais unless otherwise stated

FINAME manufacturer financing refers to funds specifically linked to sales transactions, with terms of up to 48 months, with the option of a grace period of up to six months and interest of between 2.5% and 6.5% per year, prefixed or increased by the Long-term Interest Rate ("TJLP"), in accordance with the terms defined by the BNDES at the time of the transaction. As part of the measures adopted by the federal government to foster investment and consumption, the Investment Support Program ("PSI") line of the BNDES that finances capital goods, investments and technology, was extended to December 31, 2014, although with an interest rate of 4.5% and 6% per year, depending on the Company's revenue volume.

The financing terms are also based on the customer's characteristics. Funds are released by the BNDES by identifying the customer and the sale, as well as checking that the customer has fulfilled the terms of Circular 195 of July 28, 2006 issued by the BNDES, through a financial agent, with the formalization of a financing agreement in the name of the Company and consent of the customer to be financed. The amounts, periods and charges of the transaction are fully reflected in the amounts to be received by the Company from the bank mediating the agreement to which the Company is the debtor. The Company retains title to the financed equipment until the final settlement of the obligation by the customer.

The difference between onward lending of FINAME manufacturer financing receivables and payables include:

- (a) FINAME transactions awaiting release: refers to FINAME manufacturer financing transactions which meet the specified terms and have been approved by all parties involved. The preparation of documentation, the issue of the sales invoice, and the delivery of the equipment to the customer have all taken place. The crediting of the related funds to the Company's account by the agent bank is pending at the end of the reporting period, in view of the normal operating terms of the agent.
- (b) FINAME past due: refers to amounts receivable not settled by customers by their due dates. The Company records provisions for possible losses on the realization of these balances, at the amount of the difference between the expected value of the sale of the collateral (machinery) recovered through the guarantee and the value of the receivable from the customer. In instances in which the machine guaranteed cannot be located, a full loss provision is made for balance of the receivable.

The machines seized as part of the implementation process are recorded at their book value, not exceeding their market value, under the category of "Other receivables", pending a final court decision, following which they are repossessed and transferred to inventories. As at March 31, 2015, the balance of repossessed machinery, included under the caption "Other receivables", Parent company and Consolidated, amounted to R\$ 8,961 (R\$ 11,919 as at December 31, 2014) in current assets and R\$ 24,947 (R\$ 27,251 as at December 31, 2014) in non-current assets.

The agreements related to FINAME Manufacturer Financing are guaranteed by promissory notes and sureties, and the main guarantor is the subsidiary Rominor. The balances are directly related to the balances of "Receivables - onward lending of FINAME manufacturer financing" (Note 5), considering that the loans are directly linked to sales to specific customers. The contractual terms related to the amounts, charges and periods financed under the program are fully passed on to the financed customers, and the monthly payments by the customers are fully used for the repayment of the related financing agreements. The Company, therefore, acts as an agent for the financing, but remains the main debtor in these transactions.

The difference of R\$48,188 between these line items as at March 31, 2015 (R\$ 55,737 as at December 31, 2014) refers to past-due trade notes, renegotiations in progress, and FINAME transactions not yet disbursed by the agent bank. Management understands that there are no risks to the realization of these receivables since the amounts are collateralized by the financed machinery.

Notes to the quarterly information (ITR) at March 31, 2015

All amounts in thousands of reais unless otherwise stated

As at March 31, 2015, the main lawsuits, which were classified by management as probable losses based on the opinion of legal counsel and, therefore, included in the provision for risks, are as follows:

(a) Tax lawsuits

Refer to the provisions for:

- (i) Social Integration Program ("PIS") and Social Contributions on Revenues ("COFINS") related to State Value Added Tax ("ICMS") on sales, which amounted to R\$ 8,214 (R\$ 8,040 as at December 31, 2014) and R\$ 37,836 (R\$ 37,032 as at December 31, 2014), respectively.
- (ii) National Institute of Social Security ("INSS") contributions on services provided by cooperatives, amounting to R\$ 2,983 (R\$ 2,862 as at December 31, 2014).
- (iii) The other tax lawsuits total R\$ 1,226 (R\$ 1,205 as at December 31, 2014).

(b) Civil lawsuits

These refer mainly to civil lawsuits in which the Company is the defendant related mainly to the following claims: (i) revision/rescission of contracts; (ii) indemnities; and (iii) annulment of protest of notes with losses and damages, among others.

(c) Labor lawsuits

The Company has recorded a provision for contingencies for labor lawsuits in which it is the defendant, for which main types of claim are as follows: (i) additional overtime due to reduction of the lunch break; (ii) health hazard premium/hazardous duty premium; (iii) stability prior to retirement; (iv) indemnities for occupational accident/disease; and (v) jointly liability of outsourced companies, among others.

The tax, civil and labor lawsuits assessed as possible losses involve matters similar to those above. The Company's management believes that the outcomes of ongoing lawsuits will not result in disbursements higher than those recognized in the provision. The amounts involved do not qualify as legal obligations.

(d) Judicial deposits

The Company has judicial deposits amounting to R\$ 47,817 (R\$ 46,759 as at December 31, 2014), of which R\$ 46,225 (R\$ 45,228 as at December 31, 2014) refers to PIS and COFINS levied on ICMS on sales, as mentioned in item (a) (i) and the other deposits are of different nature and classified in non-current assets.

15 Income tax and social contribution

Income tax is calculated at the rate of 15% on the taxable profits plus a 10% surcharge on taxable profit exceeding R\$240, and social contribution is calculated at the rate of 9% on taxable profits. The subsidiary Rominor pays income tax and social contribution on a presumed profit basis.

The table below shows a reconciliation of the tax effect on the Parent company's profit before income tax and social contribution by applying the prevailing tax rates as at March 31, 2015 and 2014:

	Parent company		Consolidated	
	March 31 2015	March 31 2014	March 31 2015	March 31 2014
Profit (loss) before income tax and social contribution	(1.396)	3.024	(2.928)	3.287
Standard rates (income tax and social contribution)	34%	34%	34%	34%
Income tax and social contribution income (expense) at standard rates	475	(1.028)	996	(1.117)
Reconciliation with the effective rate:				
Share of the profits (losses) of subsidiaries and provision for the net capital deficiency of subsidiary	(1.427)	(243)	-	-
Research and development	60	1.099	60	1.099
Interest on capital	-	110	-	110
Management profit sharing	-	(37)	-	(37)
Other additions (deductions), net (a)	515	26	180	(295)
Current and deferred income tax and social contribution income (expense)	(377)	(73)	1.236	(240)

- (a) The amounts in the Consolidated quarterly information refer basically to the differences in the calculation of income tax and social contribution between the actual taxable profit and presumed profit basis, due to the fact that the subsidiary Rominor is a taxpayer on a presumed profit basis during the reporting periods, and due to the non-recognition of deferred taxes on the tax losses of foreign subsidiaries.

The changes in deferred tax assets and liabilities, Parent company and Consolidated, for the quarter ended March 31, 2015 were as follows:

CURRENT ECONOMIC SCENARIO

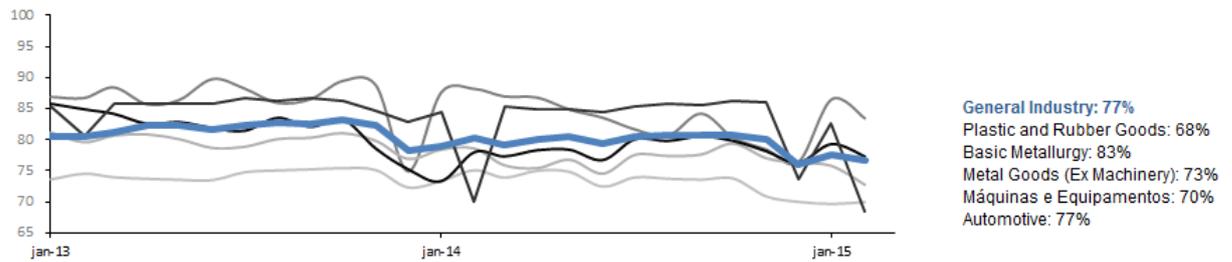

The first quarter of 2015 continues to show a slowdown of the economic activity and, mainly of the Brazilian industry, due to the uncertainties surrounding the market since 2014. In March 2015, the ICEI (Industrial Entrepreneur Confidence Index) reached its lowest level since the 2008 crisis, evidencing a highly uncertain scenario, which discourages business expansion and has an adverse impact on the country's level of investments, as shown below:

Important segments of the local manufacturing industry, such as the automotive industry, according to data from the Brazilian Association of Automotive Vehicle Manufacturers (ANFAVEA), recorded in the first quarter of 2015 compared to the same period in 2014 a 16.2% drop in the number of vehicles produced and 22.1% in the number of farming machinery produced.

Apparent consumption (sum of sales of domestic and imported machinery and equipment) of machinery and equipment in Brazil increased 6.0% in the first months of 2015 compared to the same period in 2014, pursuant to data from the Brazilian Machinery and Equipment Industry Association (ABIMAQ). There was, however, a 7.4% decrease in the order backlog and an 8.8% decrease in the use of installed capacity.

The level of installed capacity utilization (NUCI) of the São Paulo state industry in general, prepared by the São Paulo State Federation of Industries (FIESP), shows downturn signs for the first months of 2015 compared to 2014.

This highly uncertainty scenario, discourages business expansion and impacts negatively country investments' level. This fact reflects on Machine Tools and Plastic Processing machines order entry, which fell by 60.1% and 22.9% respectively compared to 1Q14.

On the other hand, the recent depreciation of the Brazilian real increased the competitiveness of local manufacturers of machinery and equipment compared with imported equipment. The domestic industry as a whole, in light of the Brazilian real depreciation, has the chance to become more competitive in Brazil and Abroad.

Against this backdrop, in recent years Romi has taken several actions to streamline its structure and the planning and manufacturing process, and respond quickly to demand's volatility. Reducing production leadtime, optimizing indirect structures, and the investments in automation are a few examples of these actions.

The Company closed the first quarter of 2015 aware of the enormous short-term challenges, but confident that the actions mentioned above have allowed reducing inventories to regular levels, control default, and have appropriate debt and cash levels, allowing that in a year of probable recession, and efforts can now be focused on bringing opportunities, aiming at sustainability and the recovery of medium- and long-term profitability.

MARKET

Romi's main competitive advantages in the domestic market – products with cutting-edge technology, the company's own nationwide distribution network, ongoing technical assistance, availability of attractive customer credit packages in local currency, and short product delivery times – are all recognized by customers, giving the ROMI® brand name a traditional and prestigious reputation.

The order entry volume in the first quarter of 2015 was 45.7% lower than in the same period of 2014 and 52.5% % lower than the volume posted in the previous quarter, showing that the current scenario of uncertainties has adversely affected the level of investment in the country.

Against this backdrop, in 1Q15 the Machine Tools Business Unit posted a 60.1% performance drop compared to 1Q14.

The Plastic Machines Business Unit, whose consumer markets are those with the greatest relation with consumption, had a fall of 22.8% in its orders entry in 1Q15 compared to the same period in 2014.

The Raw and Machined Cast Iron Parts Business Unit's demand was 10.0% lower in the first quarter of 2015 compared to the same period in 2014, due to order entry drop for trucks sector, which was compensated partially by wind power sector. On the other hand, the order backlog posted growth of 48.4% compared to 1Q14, driven by the demand in the wind power segment, one of the main segments supplied by this Unit.

OPERATING PERFORMANCE

NET OPERATING REVENUE

The Company's net operating revenue in 1Q15 reached R\$120.9 million, 19.7% down from 1Q14, and the main decrease was posted by the Machine Tools Business Unit, commented below.

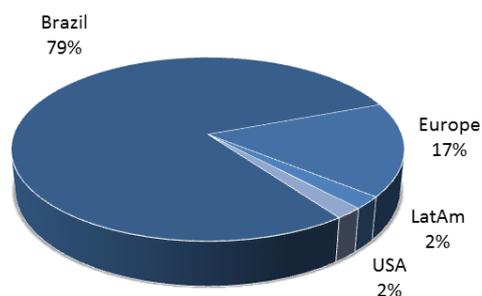

Compared to the previous quarter, it is normal that there is a decrease in the volume billed duly to the natural seasonality of this type of business. Traditionally, the revenue volume is higher than in the second half of the year, due to the sales conducted in trade shows that take place in May.

Net Operating Revenue (R\$ 000) ⁽²⁾	Quarter				
	3Q14	4Q14	1Q15	Chg 1Q/1Q	Chg 1Q/4Q

⁽¹⁾ The income statements by Business Unit and B+W's financial statements are presented in the appendices to this release.

The domestic market accounted for 79% of Romi's revenue in 1Q15. Considering the revenue obtained in the foreign market, which takes into account sales by Romi's subsidiaries abroad (Mexico, United States, United Kingdom, France, Germany and Spain, and B+W), the breakdown of Romi's total revenue, by geographical region, was:

1Q15

1Q14

Below we show the revenue obtained in the foreign market, in reais and US dollars:

Foreign Sales					
		4Q14	1Q15	Chg 1Q15/1Q14	Chg 1Q15/4Q14
Net Sales (R\$ million)	32.7	81.3	26.6	-18.8%	-67.3%
Net Sales (US\$ million)	13.8	32.0	9.1	-34.3%	-71.5%

Machine Tools

This Unit's net operating revenue reached R\$69.5 million in 1Q15, of which R\$7.1 million refers to the consolidation of B+W's net operating revenue. This consolidated amount represented a 31.3% decrease when compared with the same period of 2014. When we exclude impacts of B+W from this comparison, this Unit's net operating revenue was R\$62.4 in 1Q15, a 22.7% decrease compared to 1Q14, as a result of the scenario of uncertainties that the country has been facing for some quarters

In 1Q15 the Unit sold 197 new machines, a volume 19.6% lower than the volume sold in the same period of 2014 (245 units).

The net operating revenue of German subsidiary B+W fell €5.4 million on 1Q15 compared to 1Q14. This is due to the fact that the deliveries are concentrated on the second semester of 2015.

Plastic Processing Machines

In 1Q15, this Unit's net operating revenue totaled R\$24.6 million, a 13.2% decline compared to 1Q14 and a 6.9% increase compared to the revenue posted in the fourth quarter of 2014.

In 1Q15 the Unit sold 41 new machines, a volume 22.60% lower than the volume sold in the same period of 2014 (53 units).

The mix of machines invoiced in 1Q14 comprises a greater share of larger machines, more complex and with higher value added.

The segments with a higher demand for this Unit's products in 1Q15 were: packaging, services, household appliances, and chemical.

Raw and Machined Cast Iron Parts

In 1Q15, this Unit's net operating revenue was R\$27.2 million, a 26.2% increase compared to the same period in 2014. This increase was due to the recovery of the wind power segment, even though the commercial vehicles (trucks) and farming segments have posted a decline in the demand for raw and machined cast iron parts.

In 1Q15 3,807 metric tons of raw and machined cast iron parts were sold, a volume 2.0% higher than the volume sold in the first quarters of 2014 (3,731 metric tons).

OPERATING COSTS AND EXPENSES

The gross margin in 1Q15, of 22.0%, was 4.6 percentage points lower than in the same period of last year, impacted by the significant decline in revenue and the mix of machine tools and the plastic processing machines, which present the largest share of smaller machines, whose margins are usually lower than other machines due to the characteristics of this equipment.

The Raw and Machined Cast Iron Parts unit presented in 1Q15, when compared to the same period in 2014, a 5 percentage point improvement of the gross margin mainly driven by the higher volume of revenue for the current quarter.

Furthermore, the level of utilization of operational assets, still low, contributes negatively to a faster recovery of operating margins, since the operating expenses have more fixed than variable characteristics, in spite of the Company's strict control over costs and expenses.

Machine Tools

This Unit's gross margin was 29.5% in 1Q15, a 4.7 percentage point decrease compared to 1Q14, due to the lower volume of revenue, which prevents the dilution of fixed costs and a greater share of conventional lathes for technical schools (education), whose margins are lower than those of the other machines in the Company's portfolio.

This Unit's operating margin in the first quarter of 2015 was negative by 6.2%, 12.9 percentage points below 1Q14, due to a decline in the sales revenue, since the operating expenses have more fixed than variable characteristics, in spite of the Company's strict control over costs and expenses, with adverse impacts on margins.

Plastic Processing Machines

This Unit's gross margin in 1Q15 reached 26.8%, a 10.5 percentage point decline compared to 1Q14, due to the decrease in the volume of revenue and the machine mix, which in 1Q15, when compared to 1Q14, sold smaller machines, whose markups are usually lower than other machines in the Company's portfolio

The Unit's operating margin for the quarter was negative by 7.1%, 11.1 percentage points below 1Q14.

Raw and Machined Cast Iron Parts

This Unit's gross margin for 1Q15 improved by 5.0 percentage points compared to 1Q14 and 4.3 percentage points compared to 4Q14, due to the increase in the revenue volume.

As commented above, the recovery of the wind power segment contributed to the increase in the volume manufactured and consequently a higher dilution of fixed costs and expenses.

EBITDA AND EBITDA MARGIN

In 1Q15, the operating cash generation as measured by EBITDA was R\$1.1 million, representing an EBITDA margin of -0.9% for the quarter, as shown in the table below:

CHANGES IN CASH AND CASH EQUIVALENTS

The main changes in the net debt position during 1Q15 are described below in R\$'000:

B+W inventories increased approximately R\$ 22.1 million on 1Q15 compared to 1Q14.

Trade Receivables and FINAME Manufacturer Financing

In 1Q15, Romi maintains a portfolio of receivables with controlled default that, coupled with the increasing pace of FINAME disbursements by the BNDES (Brazilian development bank), contributed positively to the generation of operating cash. .
